Subject: Agreement Closing Letter for Wise1HRM System

Dear Andrew,

I hope this letter finds you well.

We are pleased to confirm the successful completion of the Wise1HRM system development, including both the web application and mobile apps for Android and iOS. As part of our commitment to delivering a robust and functional system, we have implemented all changes requested by Mr. Sami, dedicated extensive time to beta testing, and resolved all bugs reported by your team and Mr. Sami. Additionally, we have integrated email notification functionality for administrators as requested.

At this point, the system is free of any known bugs. The Android and iOS applications have been uploaded to the Play Store and App Store, respectively, and are pending approval to go live.

We have already deployed the final version of the system on your server. As a security precaution, we kindly request you to update the credentials for your server and Wise1HRM admin accounts to ensure we no longer have access to your system.

Finally, as per our agreement, we kindly request the release of the final payment at your earliest convenience.

Thank you for choosing us for this project. It has been a pleasure working with you, and we look forward to the possibility of collaborating on future projects. Please let us know if you require any further assistance.

Sincerely,

Khizar Mughal
General Manager
